I am a long-distance truck driver and rely heavily on the XM Radio Instant Traffic & Weather reports I get throughout the day. I pay a monthly fee to use this service, and if the ability to receive continuous weather updates is taken away, I will have no need for the XM Radio. Knowing the current and upcoming weather in the part of the country to which I'm driving makes it easier for me to map out the route I can safely take to my next appointment.

I urge you to oppose HR 4026 and reject NAB's petition 04-160.
